Programming

specialize

generalize

mutate

If you are under 40
and doing C++,
you might wanna get out.

“If you are under 40
and doing C++,
you might wanna get out.”

Stanley Lippmann, C++Now 2013 Keynote

Most ridiculous thing
I've ever heard at
C++Now...

But, he isn't
totally wrong.

Save your
Job, learn
Programming

So, what do you do if you
are a programmer?

Become a better
programmer?

Learning Programming is
hugely popular.

Its already taught from
Kindergardenlevel

In 10 Years

- Programming will be like speaking a foreign language
- Will demand keep up, or not?
- Machine learning might ease our days and make us more productive.
 - More productivity = less Jobs.

So, what do you do if you
are a programmer?

Become a better
programmer?

Think outside the box.
Learn to apply the tools of
programming in other
fields.

Domain knowledge +
Programming should open
interesting ways for your
future.

Also, have an exit plan.
Its better to have a
Plan B...
